YASH CHAUSHARI - 202201229

SAUMYA VASA - 202201254

1. **Problem Area:** Travelers often don't know about nearby attractions or interesting spots when exploring a new or familiar location.

HMW Questions:

- How might we help users discover hidden gems in their local area?
- How might we make the process of finding nearby attractions effortless and engaging?
- How might we provide personalized recommendations based on the user's preferences?

2. **Problem Area:** Users want to avoid crowded places or plan their visits during less busy hours.

HMW Questions:

- How might we provide real-time crowd information for popular spots?
- How might we suggest the best times to visit certain locations?
- How might we help users feel more confident about their travel plans with up-to-date crowd details?

3. **Problem Area:** Travelers may face difficulty navigating to new places or finding the best route.

HMW Questions:

- How might we provide clear and accurate directions to local attractions?
- How might we help users choose the most convenient mode of transportation to reach their destination?
- How might we ensure users feel supported even in areas with limited connectivity?

4. **Problem Area:** Travelers have diverse needs depending on whether they are solo, in groups, or with family.

HMW Questions:

- How might we tailor our recommendations to suit solo travelers, families, and groups?
- How might we make group travel planning more seamless within the app?
- How might we address the unique needs of elderly travelers or those with accessibility concerns?

5. **Problem Area:** Users seek an engaging and enjoyable app experience that adds value to their trip.

HMW Questions:

- How might we gamify travel discovery to make it more exciting?
- How might we allow users to create and share their own travel stories or itineraries?
- How might we reward users for exploring new places and using the app?

6. **Problem Area:** Travelers may decide to explore spontaneously without prior planning.

HMW Questions:

- How might we help users plan their outings on short notice?
- How might we provide quick suggestions for places to visit within their current location?
- How might we make the app work effectively for users who are unfamiliar with the area?
